Live Slide Decks

Beamer in vinary-viewer

vinary-viewer

Detection

- Beamer's Creator tag: a definite deck

Detection

- Beamer's Creator tag: a definite deck
- A slide tool's exact page canvas: a probable deck

Detection

- Beamer's Creator tag: a definite deck
- A slide tool's exact page canvas: a probable deck
- Landscape pages alone: never a deck

Flip latency

A key shows its slide in the next frame:

$$L = h + U, \qquad U \sim \mathcal{U}[0, T_f), \qquad T_f = \frac{1000}{60}\,\mathrm{ms}$$

Flip latency

A key shows its slide in the next frame:

$$L = h + U, \qquad U \sim \mathcal{U}[0, T_f), \qquad T_f = \tfrac{1000}{60}\,\mathrm{ms}$$

Median $\approx 8\,\mathrm{ms}$ on a 60 Hz display.

Live refresh

While LaTeX runs

The last complete version stays on screen.

When it finishes

The new deck swaps in place, on the same slide.

Keys

$\rightarrow$, Space	next slide
Shift+$\rightarrow$	next frame (skip overlays)
F5	present full screen
Tab	overview of every frame
